

## Synthetic Green taking shape

The Queenscliff Bowls Club and Board of the Club are to be congratulated for their foresight and continued support of Bowls in the area through plans for the development and establishment of a new Synthetic Green which should be great all the year round but of special value during winter.

The construction of the new green has commenced, with work progressing well and on track for a grand opening on June 20, 2010 although the green will in fact be in play from early June.

With this new facility, players will have the opportunity to develop their skills on both grass and synthetic surfaces.

It is pleasing to see that the Board continues to have this future vision for the Association. The installation of lights and resurfacing of the Tennis courts at the Club, allowing the Borough of Queenscliffe to install lights on the netball courts and the establishment of a synthetic Tiger Turf Bowls Green further enhances the standing and facilities of the Association at Queenscliff.

While we welcome the new synthetic green we are also mindful of our important and hard working grounds team, lead by Barry Orvis. It is through the continued first class standard of all greens for our Bowls and Croquet clubs, that we are able to continue to attract first class players and competitions to our Clubs!

Go Couta's Go!
